

← Environmentally Conscious Packoff/Line Wiper

- ▶ Unique design
- ▶ Change bottom sub to make equipment 5ksi, 10ksi, or 15ksi compatible
- ▶ Packoff section provides seal around static cable
- ▶ Wiper section returns stripped fluids to containment system
- ▶ Easy maintenance and guide/rubber replacement

Grease Control Head →

- ▶ Maintains a seal around a static or moving wireline when a grease injection system is utilized
- ▶ Prevents escape of wellbore fluids
- ▶ Grease seal is achieved by pumping a viscous fluid between the wireline OD and flowtube ID
- ▶ Flowtubes are available in sizes to fit most wireline
- ▶ Sections can be added or removed to compensate for pressure variations
- ▶ Bottom sub contains velocity check
- ▶ Available in most IDs and pressure ratings

When ordering this equipment please specify the following:

- ▶ ID (inner diameter)
- ▶ Required working pressure
- ▶ Bottom union type
- ▶ Top union type (grease control head only)
- ▶ Line size(s)

Please see page 84 for a list of common part numbers.
