

## 90-GALLON ACCUMULATOR

### DESCRIPTION

- The 90-Gallon Hydraulic Accumulator skid is used to provide a reliable source of hydraulic supply to actuate a quad and tandem BOP. A 56 HP diesel engine powers the system's hydraulic pump which charges six 15 US gal accumulator bottles that provide sufficient volume for multiple BOP ram actuation.

### FEATURES

- 6 X 15 US Gal bottles w/ 1 x N2 backup system.
- Three cylinder, 56 hp diesel engine w/ electric start and auto start/stop capability.
- 1 x remote control box w/ 100' cable, 1 x 100' cable for CTU.
- Capable of closing 6 ram sets in <60 sec (1,900 psi remaining).
- Closing Times (Close-Open-Close):
  - ▶ One ram set: < 15 seconds
  - ▶ Four ram sets: < 40 seconds
  - ▶ Six ram sets: < 60 seconds (1,900 psi remaining)

### ADDITIONAL NOTES

- Webasto diesel fired heater system for engine and hydraulic tank
- Solar panels for trickle charging batteries
- LED working lights
- Optional metal panels or soft cover protectors (solar panels soft covered)
- Four-point lift (frame certified)
- Certified sling set
  - ▶ Forklift pockets
  - ▶ 2.5" x 2.5" reinforced square tubular frame
  - ▶ Floor pan with 2" lip for spill containment
  - ▶ Manual controls in the event of an electrical system malfunction
- Max Gross Weight: 12,500 lbs.
- Dimensions: 90.5" x 68.75" x 97.75" (L x W x H)
